

# Comprehensive Water Management Services

HIGH PRAIRIE  
• • • OUTDOORS • • •  
OUTDOOR LIVING SPACES BUILT FOR YOUR LIFE

The most  
advanced smart  
water and site  
management  
technology  
is now within  
your reach.

**We provide beauty, savings & service for our elite residential clients.**

**Homeowners** will enjoy beautiful landscapes, reduced water costs, fewer expenses, greater service transparency and better equipment.

**Landscape managers** will utilize better technology and access to deliver better system performance.

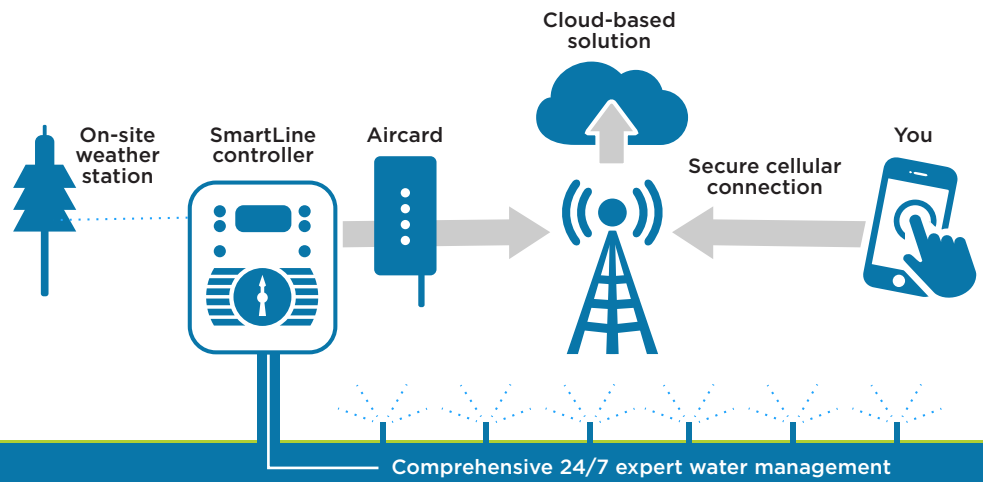

**Our community** will benefit from resource conservation, community beautification and participation in our global water initiative #SaveWaterGiveLife.

## How does it work?

## How do we do it?

**State-of-the-art equipment, 24/7 monitoring and weather-based programming creates healthier, more beautiful landscapes with controllers that adjust daily for precise plant needs and protect site assets.**

**Save Water** - Our systems save an average of 38% and are EPA WaterSense Certified.

**Save Money** - Protect plants and structures from damage resulting from over/under watering, reduce liability and avoid fines from watering violations.

**Protect People** - Avoid liability hazards like icy walkways & roads and other structural damage.

**System Visibility & Analysis** - Asset mapping, verified inspections & repairs & detailed reports

**24/7 Remote Access & Alert Monitoring** - Instant notification of issues like stuck valve & breaks

**Social Responsibility** - Conserve water, give back and contribute to global sustainability.

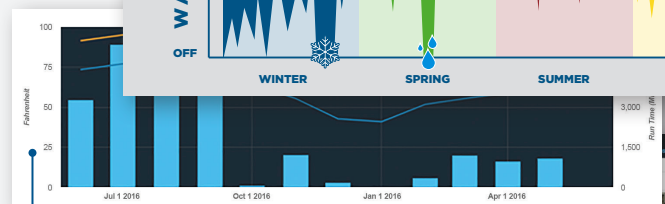

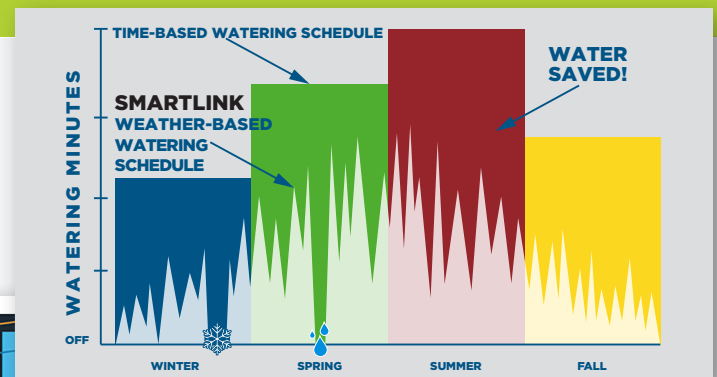

**What does it cost?** As a Weathermatic Premier Partner, we can now offer the equipment upgrades and enhanced service as part of our regular service contract. You will be cash flow positive as early as day-one!

### SmartLine Controller and Weather Station

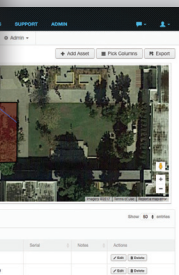

- Controller makes daily water adjustments based on:
  - high/low temperature
  - humidity
  - plant type
  - soil type
  - sprinkler type
  - slope
- Weather station set at each controller and communicates wirelessly
- Meets EPA Water Sense Criteria

### SmartLink Software

- Uses cellular communication & Amazon Cloud
- Programming changes can be made remotely from any web enabled device
- In-depth reports of run times and weather data
- Asset tagging and zone mapping
- Web based inspection reports with photo documentation
- Daily alert reporting

Program	Run Time	Run Days	Run Time	Run Days	Run Time	Run Days	Run Time	Run Days	Run Time	Run Days
1	00:10	Mon	00:10	Tue	00:10	Wed	00:10	Thu	00:10	Fri
2	00:10	Mon	00:10	Tue	00:10	Wed	00:10	Thu	00:10	Fri
3	00:10	Mon	00:10	Tue	00:10	Wed	00:10	Thu	00:10	Fri

## You'll Participate in #SaveWaterGiveLife, a Global Water Initiative

As a client, you, your family, landscape managers and others will participate in this inspiring program that works in thirsty communities to provide **one lifetime supply of water for one person for every smart controller we install.**
